Our core commitment is to make dental health a real possibility for everyone. Since oral and overall wellness are linked, helping underserved people have healthy smiles can really make a difference in their health and happiness overall.

We've created a new kind of dental coverage, combining powerful, innovative dental benefits technology with tried-and-true collaboration with dental professionals nationwide.

### How Dentegra PPO works

Dentegra PPO plans provide groups a great balance between network access and cost management. And with plan designs that encourage regular checkups and cleanings, they can be a terrific part of maintaining enrollees' overall health.

Enrollees can see any dentist they choose, but Dentegra dentists agree to provide service for reduced fees for Dentegra enrollees. Plus, visiting a Dentegra PPO dentist eliminates the hassle factor - enrollees only need to pay their percentage of services up front – Dentegra dentists will file claims and accept payment directly from Dentegra.

### Our dentist networks

Dentegra PPO plans offer a robust dentist network with more than 204,000 access points throughout the country. Many of our dentists provide essential, patient-friendly features like extended hours and service in the languages our enrollees speak. And, because we contract with dentists directly, rather than leasing networks, we ensure the quality of our providers. We also closely monitor claims for both appropriateness of care and adherence to the cost-management guidelines that keep our plans affordable.

### About Dentegra

Dentegra Insurance Company, headquartered in San Francisco offers dental insurance plans in 50 states and the District of Columbia.

Dentegra is part of a nonprofit holding company, Dentegra Group, Inc., which is composed of several independent dental benefits corporations — making the Dentegra Group one of the country's largest integrated dental benefits systems, administering benefits to 27 million people.
